PROJECTS

Intellectx - multi tenant SaaS for collaborative platform

September - PRESENT

- A dynamic platform which enables companies to virtually manage and communicate their day to day operations
- Created with a strong focus on **scalability** and **maintainability** in mind with **clean Architecture**
- Project flows through a **microservice** pattern with a asynchronous queue message system that is set up using **NATS streaming**,
- The application's structure is modular, divided into four distinct services: tenant, company, communication, client
- Project has features like creative chat section with distinct channels, in chat files sharing using **s3 bucket**, exclusive **group video call** interface, **notifications** and more...
- Uses **socket.io** for real time chat and **WEBRTC** for real time video call
- Containerized all services with **Docker** and orchestrated it using **Kubernetes**
- Created a **CD Pipeline** using **GitHub Actions** for **Continuous Delivery**
- Designed and executed the entire module, incorporating **REST APIs** to ensure seamless functionality across both mobile and web applications

Technologies Used -

- Node, TypeScript, Nextjs, Express, Redux, MongoDB, JWT
- Microservices, Clean Architecture, basic Docker, basic Kubernetes, NATS
- WEBRTC, Socket.io, s3, Claudinary, github-actions, tailwind css, nodemailer, etc...

SKILLS

Node, React,
TypeScript, Express,
MongoDB,
Clean Architecture,
Next, Redux, Docker,
Kubernetes,
NATS, Socket.io,
github-actions,
Tailwind-css,
handlebars

INTEGRATIONS

JWT, Twilio,
nodemailer, razorpay
S3 buckets, WEBRTC

TOOLS & PLATFORMS

Postman, AWS EC2,
Digitalocean cluster,
scaffold

LANGUAGES

English, Hindi, Malayalam

COZASTORE – e-commerce platform for apparels

February 2023 - April 2023

- An ecommerce platform that contains features like **product listing, cart, checkout, coupons, payment gateway** etc...
- It also has a admin side that contains features such as **sales data visualizations, product, user, coupon management** as well
- planned and implemented the whole module with **MVC architecture**

Technologies Used -

- Node, Express, Handlebars, Mongoddb
- Nodemailer, Razorpay,
